

MEI SC Advance® Series

Advanced note acceptor performance

SC Advance® by MEI is designed to meet the demanding requirements of the gaming, amusement, and sports betting markets, where speed, accuracy, and reliability are critical. It delivers high validation accuracy, advanced fraud protection, and fast processing to maximize uptime and player throughput. Capable of accepting up to 100 currencies and denominations, SC Advance® provides the flexibility required for multi-market operations. The unit can be audited, configured, and updated through CPI Cashflow™ STS PC-based support tools, ensuring efficient and centralized device management.

Key Features

- High acceptance rate: 98% or greater
- Advanced recognition system with second barcode sensor for improved global ticket validation and 4-way ticket acceptance
- New note transportation system for reliable performance in all conditions and reduced jam risk
- Sealed smooth note path (short and tall) protected against dust and fluids
- Banknote insertion of up to 100 notes, 4-way (face up and face down)
- Barcode coupon insertion, 2-way (face up)
- Multiple serial protocol interfaces and USB connectivity
- Accepted banknote dimensions: 62-83 mm width and 120-166 mm length (up to 177 mm with extended cash box)
- Durable, high-impact welded plastic cash box
- Robust chassis with heavier gauge steel for enhanced durability
- Protected internal mechanisms and components
- Traffic light LEDs for front-line machine diagnostics
- Easy firmware updates via interface cards
- Bezel options available: Bunch Note Feeder (BNF), Universal, Coin-resistant and others
- Flexible mounting options
