

Assa Desmo Locks

Unmatched Security for
Demanding Environments.

ASSA ABLOY

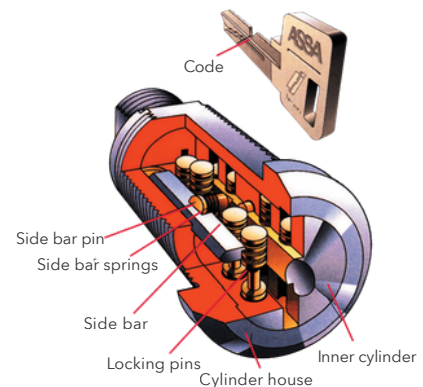

The ASSA DESMO is a patented high-security locking solution engineered for the demanding environment of gaming floors and cash-handling areas. Its direct-drive pin technology, operating without springs, ensures reliable performance even in dusty, high-traffic, and intensive-use conditions.

With advanced anti-picking protection, false-cut pin security, and strictly controlled key blank distribution, ASSA DESMO safeguards assets, cabinets, and critical equipment against unauthorized access. Designed for long-term durability and operational continuity, it delivers the uncompromising security that gaming environments require.

Key Features

- Patent protected against unauthorized key duplication
- 8-pin lock combined with two strong side bars
- Standard 90 degrees operations and key removable in locked position. Also available as option with removable key in either locked or unlocked position
- Standard supplied with 32 mm cam, other sizes and models available on request
- Virtually frictionless key entry
- Various collars available to adjust any mounting depth
- Switchlocks available in same keycode as standard camlocks
- Keyed-different locks are supplied with 2 keys per lock

D1118KXXX	ASSA Desmo high security lock keyed-alike - Ø 28,5 mm - (the x represents the quantity)
D1118KD	ASSA Desmo high security lock keyed-different - Ø 28,5 mm

Version: ASSA DESMO Removable Core - Flexible Security Made Easy

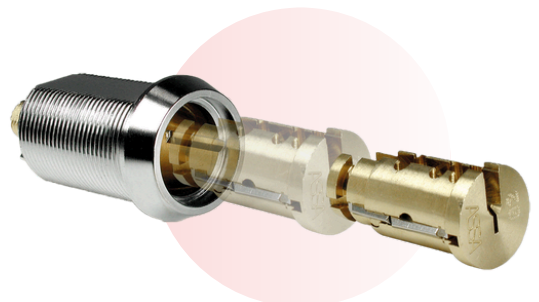

Building on the proven ASSA DESMO locks, this version features a removable core that can be quickly and securely swapped using the special management key, making pre-installations fast, safe, and efficient.

If an operator key is lost, the lock can be re-keyed easily and cost-effectively without replacing the entire unit.

An optional service tool allows safe handling during installation, and an optional color-coded system simplifies core and key identification.

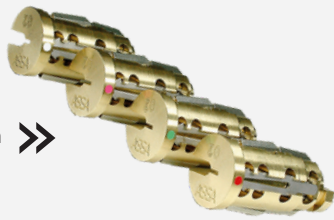

Key Features

- 6-pin lock with reinforced side bars and false cuts for superior pick resistance.
- Patent-protected design prevents unauthorized key duplication.
- Core easily replaced using a special management key with three code heights for fast re-keying.
- Pins mounted from one side and covered by a removable plate for simple maintenance.
- Large nickel silver key ensures durability and comfortable operation, with standard 90° rotation.
- Flexible installation with adjustable collars, keyed-alike RC switchlock option, and multiple cam sizes available.
