

RGB Handle Mechanism

Compact Design.
Dynamic Illumination.

The Compact RGB Handle Mechanism combines reliable mechanical performance with integrated RGB illumination in a space-saving design. Engineered for gaming and amusement applications, it delivers smooth operation, durable construction, and dynamic lighting control to enhance both functionality and visual appeal. Its compact footprint allows easy integration into modern cabinet designs without compromising performance.

Key Features

- Ultra low-profile design allows for external mounting on cabinet and provides increased space inside of the cabinet
- Ruggedized die cast design to provide long-term performance
- RGB attract mode on handle mechanism cover to attract additional attention
- Pre-programmed with unique flashing patterns and color combinations
- As handle is pulled LEDs light up with each of the six clicks of the handle movement. All LEDs light up when handle is fully pulled
- RGB illuminated mechanism ball with 2 multi-color LEDs that flash, glow or flash light patterns to further trigger your interest in your handle machines
- 45° rotation
- Easily to remove for improved serviceability
