

The Ultimate **Electronic Reprogrammable Lock**

Secure, remote access control with operational visibility

Identifies each user, checks permissions, records each operation

Patented high-tech stainless-steel locking system with **self-powered** key sets

Features

- Never again change locks when a key is lost, or employee dismissed
- Carry far fewer keys for your fleet or location
- Drop-in replacement for existing locks – self-powered, no wiring
- Remote authorization and traceability with Bluetooth option
- Automatically logs access times and user – no more manual logging
- Authorization reissued daily, or on demand
- Grant temporary access to technicians or others

Design

- ✓ Standard cam or cylindrical formats, custom sizes available
- ✓ 90°, 132°, 180° rotation limiters, right and left
- ✓ IP65 for outdoor usage
- ✓ AES 128-bit encrypted communication
- ✓ Over 10 billion combinations

Bluetooth Connectivity

Fully control your locks from any remote location even from a smart phone or a tablet

Program a Unique-Code for each lock with multiple User Key access, or Multi-Code to pair each lock with multiple key codes for a hierarchical or simple master key system.

Keys

Master Key
Programs lock pairing with User and Download Keys

User Key
Unique-Code or Multi-Code

Download/Audit Key
Retrieve access history stored in locks

Bluetooth Key
Communicates with smartphone or tablet to headquarters

Accessories

Cylinder Adapter

Handles and Covers

Padlock

Software

- ✓ Retrieve lock history with the Download Key, insert in supplied USB Pod, and display/export the event history.
- ✓ Create and check permissions, black and white lists, reprogram keys, set access time limits, monitor and control each operation.
- ✓ Communicates from headquarters to iPhone or Android smartphone/tablet apps, and then to users' Bluetooth Keys.
- ✓ Runs on a secure Cloud-based platform or your own server.
