# AGE 300 ID Card Reader

## Triple Technology Card Reader

The AGE 300 reads magnetic, contact chip, and contactless ID cards. The AGE 300 can extract all data necessary to assess a user's birthdate and other relevant information. By inserting a card it is possible to read up to 3 magnetic tracks, asynchronous contact chip, and multiple protocol contactless chip. The AGE 300 supports USB, Serial and ccTalk protocols.

• Smart card and service card reader with manual insertion
• Magnetic stripe (ISO-7811, T=0 or T=1 protocol)
• Asynchronous contact chip (ISO-7816)
• Chip without contacts (NFC Forum compliant)

Features

✓ Small dimensions: 91x70x25 mm
✓ Smart card reader: 300.000 operations
✓ Magnetic head reader: 600.000 operations
✓ Integrated Antenna
✓ Multiple color RGB Led in the bezel
✓ Power supply of 5V, 3V and 1,8V are supported
✓ CcTalk serial interface
✓ Bootloader

Connectors	
A: RS232 Serial Interface	
B: USB 2.0 Full Speed Interface	
C: CcTalk Serial Interface
