

## 55" EDGE

The Ultimate Videowall Replacement

### 55" of Spectacular Engineering

The 55" Edge has been designed as a cost effective, more energy efficient, longer lasting alternative to the popular 55" LCD video wall panel. Specifying and installation have never been easier due to the familiar 55" size and multiple mounting options. Move away from LCD bezels and embrace a true large format display.

### Colour Accuracy

Colours make up reality. Colour enhancing LED technology with superior colour purity and a wide colour gamut produce vibrant and natural colours for eye-catching, true to life imagery.

### Fixed Resolutions & Custom Sizes

The 55" EDGE can achieve fixed resolution: 1080p, 4k UHD, 8K or custom resolutions, shapes and sizes.

### Modular Formation

Customise the screen size and shape to fit your desired environment

### Lasting Performance

A lifespan of 100,000 hours with robust durability gives you lasting peace of mind.

### Slim Design

A sleek, slim form factor with a needing no mounting kit allows for an easy and seamless integration into any environment.

### Easy Maintenance

Direct front access to critical components allows for quick, convenient maintenance.

### Glue-On-Board (GOB) Optional Upgrade

Transparent epoxy glue, protects the LED from any harmful accidents.

### Light Weight

On average up to 4kg lighter per cabinet vs LCD

### Seamless Black Surface

Aesthetically complement any luxury space with a sleek, black surface and bezel-less look.

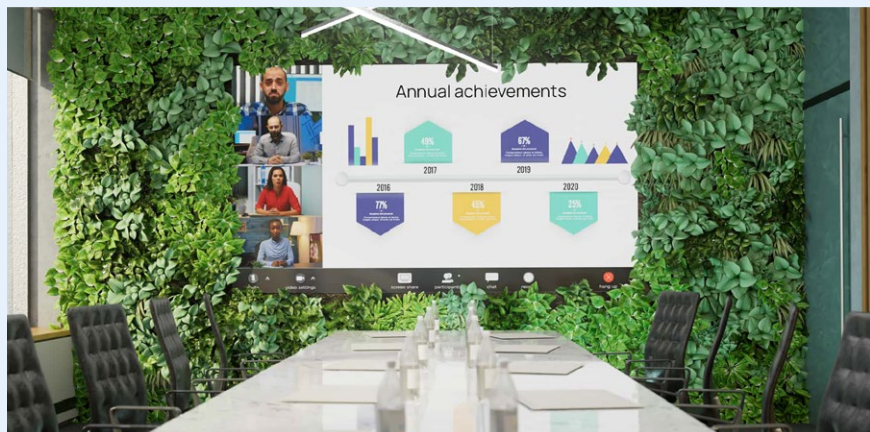

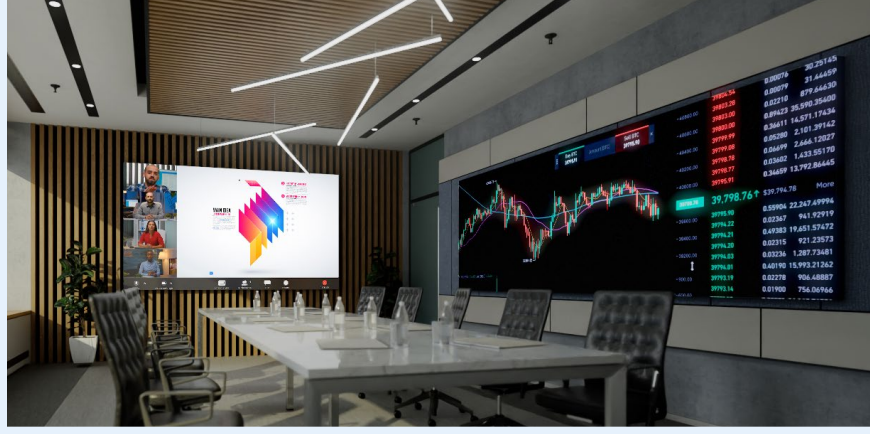

### Shock Resistance Technology

A shock-resistant surface protects against dust, water and everyday impact.

### 180° Viewing Angles

## Two Mounting Methods

Having the freedom to attach a LED display to an existing mounting solution can make a big difference. The industry standard VESA or wall mounting options enables the EDGE platform to be attached in a matter of seconds for quick and easy mounting.

Wall Mounts
