

Elo Touch Solutions

Open Frame
Gaming Monitors

The Elo logo, consisting of the word "elo" in a bold, black, sans-serif font. The letter "e" has a small blue horizontal bar above its top left curve.

Brilliant Display. Superior Quality. Competitive Price.

Elo is the global leader in commercial touch, with over 20 million installations worldwide—half a million units per year and nearly 2,000 units shipped every day. SUZOHAPP is the world's largest distributor of this premium open-frame product line. Designed and engineered specifically for the demanding needs of the gaming industry, the 90-Series open-frame displays feature fully integrated touch technology—not glued-on components.

Key Features

- Next-generation Projected Capacitive (PCAP)
- 2GS (two-glass solution) technology
- Highest optical quality and long-term durability with no plastic films or metal mesh
- True-flat 10-touch capability
- Thru-glass mode supporting up to 6 mm customer-supplied glass
- Common mechanical and electrical components across the entire line for simplified design-in, compliance testing, servicing, and size transitions
- Built-in watertight edge seal
- HDMI, DisplayPort, and VGA inputs with a consistent port layout across all models
- Magnetic, tethered OSD control box
- Unique field-replaceable touchscreen glass
- Global certifications: UL, FCC (US); CE TÜV (EU); RCM (Australia); cUL, IC (Canada); CCC (China); VCCI (Japan); KCC (Korea); CoC (Mexico); BSMI (Taiwan); CB; RoHS
- Passes UL and IK07 Ball-drop tests
- Demonstrated MTBF of 50,000 hours
- Standard 3-year global warranty

Choose from a wide selection of sizes—from 10" to 27" Desktop Touchmonitors and All-in-Ones, up to 65" Interactive Digital Signage.

Ideal for front- and back-office applications, interactive digital signage, bingo, lottery, sports betting, player tracking, loyalty systems, and POS.

VisionPro

High Quality LCDs for
Gaming, Amusement,
Sports Betting, Lottery,
and Bingo

VisionPro™ is SUZOHAPP's premium LCD line, built with top-tier panels and high-quality boards. We offer fast customization for both OEMs and upgrades, covering sizes from 6.2" to 90". Options include specialized panels, custom metalwork, oversized glass, touchscreens, and a wide range of input configurations. Share your requirements with us, and we'll design and build a solution that fits your needs perfectly.
