SBT-OTC

Over-the-Counter Sports Betting Terminal

For more traditional customers—or in environments where controlled betting is required—you can allow your cashier to manage all bets directly. The SUZOHAPP OTC solution is modern and modular, built on the same core component engines as SUZOHAPP's kiosk SBTs. This ensures streamlined software development, consistent performance, and simplified certification across different form factors.

High Performance, High Quality Components

- Intel 4-Core i3 processor, 8GB RAM (expandable to 64GB), 128GB SSD
- 15" PCAP touch monitor
- CUSTOM P3 thermal roll printer with cutter
- Newland HR3280 scanner
- 3-year global warranty on the computer; 5-year warranty on the scanner
- Global certifications

Shown with optional 13.3" customer display and MSR

Standard Configuration and Accessories

The standard configuration includes an Intel i3 processor, a 15" display, and an optional 10" customer-facing display connected via a single USB-C cable. The I/O hub provides 7 USB ports (including powered USB), 2 serial ports, and a cash-drawer port. Up to four integrated peripherals can be mounted on the display edges, such as an MSR, RFID reader, EMV cradle, webcam, fingerprint scanner, or status light.

Flexibility / Options

Available options include a choice of processor (Celeron, i3, or i5) with expandable RAM and storage. Display options include multiple main display sizes (15", 15" wide, 17", or 21.5") and secondary displays (10.1" or 13.3", with or without touch). The system can be configured for countertop or wall-mount installation. Additional printer and scanner options are available when required.

Different Form Factors with Easy Integration

- Unified computer platform for both front- and back-of-house units
- Common manufacturer for scanners, printers, and card readers
