

# Venia Locks & Keys

Advanced Security.  
Engineered for Protection.

**VENIA**<sup>®</sup>

Designed for applications requiring enhanced protection, Venia Locks deliver reliable, high-security performance for medium- to high-value equipment. The advanced 14-pin system, including key-side and edge pins, provides superior resistance against tampering and unauthorized access. Constructed from durable brass with a high-quality spindle and bright chrome finish, these locks combine strength with a professional appearance. Available in keyed-different or keyed-alike configurations and offered as camlocks or switchlocks, Venia Locks include security collars to prevent forced rotation, nickel silver keys for long-lasting use, and optional colored key covers for easy identification.

## Key Features

- Durable brass housing with high-quality spindle and bright chrome finish for long-lasting performance
- High-security design with integrated security collar to prevent forced rotation or tampering
- Nickel silver keys for extended lifespan, smooth operation, and reliable, trouble-free use
- Available in keyed-different or keyed-alike configurations to suit a variety of applications
- Offered as camlocks or switchlocks to fit multiple cabinet requirements
- Optional colored key covers for easy identification and key management
