- Customizable front panel graphics included

- Electronics housed in the door panel for easy maintenance and service access
- Custom tilting dispenser mechanism for smooth and reliable ticket delivery
- Contactless and mobile payments supported (MDB protocol), including integrated SWISH payment system
- Advanced dual-panel printing and etching on the front panel for enhanced visual design
- LED lighting behind the front panel and in the dispensing tray for improved visibility and appeal
- Optional cash payment via additional side car unit
- Optional camera-based age estimation system

Key Benefits

Easy Serviceability

« Customized tilting mechanism, to easily fill each dispenser. Dispensers can be easily adjusted to accommodate all ticket lengths

High Capacity & Modularity

The modularity of the ITV machine allows for a multitude of dispenser configurations. It has a capacity of up to 15 dispensers, with large ticket trays situated behind each dispenser.

Customization

State of the art dual panel printing and etching on Front Panel to enhance graphic design. Front panel customization included!

»

Remote Monitoring & Management

The machine is equipped with remote management features that allow operators to monitor inventory levels, track sales data, get stock status alerts, and manage machine settings and software from a centralized location (PC, tablet, mobile phone). This helps optimize operations and maximize profitability.

High Security

«
- 11-point locking bar
- Custom lock with Four Eyes Priciple
- Secure hinges over full length of door
