

# Xlock Locks

Medium-Security,  
Simplified Installation.

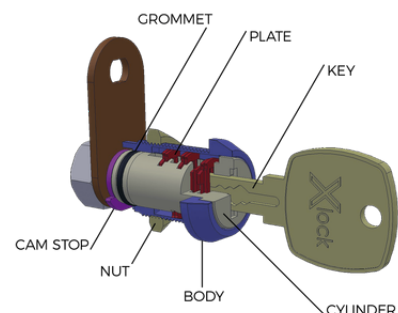

The XLock range delivers a competitive, medium-security locking solution engineered for OEM applications across gaming, amusement, and related equipment. Designed with reliable 10-pin operation, robust die-cast housings, and durable nickel silver keys, XLock camlocks and switchlocks combine practical performance, wide keycode availability, and flexible configurations to meet diverse access and security needs. Available keyed-different or keyed-alike, these locks ensure consistent operation and easy integration into a variety of cabinets and machines.

## Key Features

- Operates with a 10-pin mechanism for dependable medium-security performance
- Die-cast housing with chrome finish provides durable protection and long-lasting appearance
- Large nickel silver keys deliver comfortable grip and extended service life
- Available as camlocks in three body lengths (16 mm, 22.3 mm, 28.6 mm) or as switchlocks with integrated terminals for easy connection
- Switchlock models support optional automatic key return for enhanced operational convenience

Offered in both keyed-different and keyed-alike configurations, with flexible re-order quantities for keyed-alike sets.
